Mobile Image App

Enables instant access to your **purchased digital images** with the tap of an app icon on your preferred mobile device (phone or tablet). The Mobile Image App is sold separately and **can only be combined with purchases containing digital images**. See product photo for a sample. Watermarks will not display on images within the app.

***Mountings**

***Standout:** These 3/4" standouts have a black plastic edging that encases lightweight foam. Sleek and slightly textured, it is a great lightweight, durable backing solution for your larger-sized prints. The back panels contain pre-drilled holes making them easy to hang on simple nails or screws.

***Styrene Mount:** Styrene is a popular mounting substrate that provides a durable backer for your larger-sized prints. It comes in a 3mm white mount, is made from plastic and is not susceptible to warping.
